PROFILE: PAYTM is India's leading digital ecosystem for consumers and merchants offers payment services, commerce and cloud services, and financial services to 337 million registered consumers and over 21.8 million registered merchants, as of June 30, 2021. Two-sided (consumer and merchant) ecosystem enables commerce, and provides access to financial services through financial institution partners, by leveraging technology. Its consumer and merchant engagement is core to their business model and unit economics. For consumers, certain payment categories like money transfer, in-store payments and bill payments are highly relevant, high frequency use cases that are efficient and pre-dominant. Products (offered in partnership with partner financial institutions, including associates such as Paytm Payments Bank, and third parties) such as Paytm Wallet, Paytm Postpaid, Paytm Payments Bank savings account and FASTag help build consumer engagement and stickiness and helps to retain consumers. Products such as personal loans, credit cards and insurance, offered through other financial partners. Similarly, for merchants, certain payments offerings, such as QR (for in-store) and Payment Gateway (for online) are primary means to on-board new merchants. India is a country of hundreds of millions of young and aspiring consumers who are underserved for payments and financial services products that serve their needs. There are millions of small businesses in India that would benefit by having increased access to affordable software, technology and financial services.
