MARKET OUTLOOK- CAUTIOUSLY OPTIMISTIC

Quantitative: Stock market indices made a gap down opening and continued on a negative bias throughout the day. Despite the fact that there has been no negative economic news in the market, investors are selling stocks due to overall signs of negativity. Interest rate hikes, inflation, quantitative tightening is weighting on investor mind. India VIX, which measures expected volatility in the equity market, rose to 21.30. Volatility is expected to remain high in the coming days given the geopolitical and inflation worries, but investors should not be worried by short-term worries and to pick quality stocks for the long term. We believe today fall was due to over all negative bias among investor, interest rate hikes and inflation.
